11/7/1996

Addis Abeba, Ethiopia

## SUMMARY

Versatile software developer with extensive experience in web development, data management, ERP implementation, and system administration. Demonstrates a proven track record of delivering robust, scalable solutions across multiple platforms and technologies. Adept at translating complex business requirements into efficient, user-friendly software applications. Possesses strong analytical skills and a commitment to staying current with emerging technologies. Excels in collaborative environments, effectively communicating technical concepts to both technical and non-technical stakeholders.

## Education

JIMMA UNIVERSITY

Sep 2016 - June 2019

BSc Information Technology(IT)

Relevant coursework: Web Development, Database Management, Network Administration, Software Engineering

Final Year Project: Developed a web-based traffic management system

## Work experience

PUBLIC SERVANT SOCIAL SECURITY ADMINISTRATION(PSSSA)

2019 - 2020

Data Encoder

Efficiently and accurately encoded large volumes of data into the organization's database systems.

Ensured data integrity and accuracy by meticulously verifying and cross-referencing information.

Collaborated closely with team members to meet strict deadlines and quality standards.

SHEMU GROUP

2022 - present

Shemu Groups Company / Jun 2023- Present

Developed and launched the Niber Foundation website, a non-profit local organization's online presence. This project improved the foundation's visibility and streamlined their donor engagement process.

Engineered the Afri General Logistics website, enhancing the company's online presence and improving user experience with server-side rendering and optimized performance.

Played a key role in the Enterprise Resource Planning (ERP) system implementation: Generated and managed comprehensive attendance reports Prepared detailed payroll reports for management review Collaborated closely with Mr. Nebyu to ensure accurate and timely reporting

## Skills

Technical Skills

**IDE:** VS code, Github

**HTML:** Structure and content

**CSS:** Styling and layout

**JavaScript:** Interactivity and logic

**Nodejs:** JavaScript runtime for backend

**MongoDB Microsoft sql server:** database for modern applications

**Testing:** Ensuring the quality and functionality of software through testing

**Hosting:** Deploying applications to servers or cloud platforms

**MS Office Proficiency:** Skilled in MS Office tools (Word, Excel, PowerPoint) for project documentation, data analysis, and presentations.

Soft Skills

**Interested in Learning New Things:** I'm passionate about learning and always seeking out new opportunities to expand my knowledge.

**Communication:** communicate effectively with my team, such as Mr. Abel and Mr. Tsegay. I actively listen, share ideas, and collaborate to achieve our goals.

## Activities

JIMMA UNIVERSITY

2017 -

*Community Engagement Intern*

Participated in the Community Based Training Program (CBTP), which involved collaborating with local communities to identify pressing issues and develop actionable solutions. Conducted surveys and interviews within the community to gather data on prevalent problems, focusing on areas such as health, education, and infrastructure. Analyzed community feedback to propose targeted interventions, resulting in the implementation of two successful projects aimed at improving local health services and educational resources.

## Honors & Awards

**Data Science Certificate**

2014

Awarded a Data Science Certificate as part of the **5 Million Ethiopian Coders Initiative**, a collaborative program initiated by the Ethiopian and UAE governments aimed at equipping 5 million Ethiopians with essential coding and digital skills. This program emphasizes practical skills in data analysis, machine learning, and data visualization, preparing participants for careers in technology and data science.

**Google Ads Certificate**

2014

Earned the Google Ads Certificate, demonstrating proficiency in online advertising strategies, campaign management, and analytics. This certification validates my ability to effectively create and manage Google Ads campaigns, optimize performance, and analyze results to drive business growth.
